

DOWN THE RABBIT HOLE

An Honest Discussion of Politics, Religion, and all Kinds of Things we are not Supposed to Talk About.

VOL 2: 4th EDITION

JANUARY 16, 2017

LET US TALK ABOUT THE REFUGEES WHO ARE IN CANADA AND WHO ARE ON THEIR WAY

In Germany, according to a headline posted on Google, dated Feb 02, 2017, migrants/refugees/rapefugees/invasors are 'banned' from swimming pools because they not only masturbate right there in the open in front of whomever's skin happens to give them a 'sexual emergency,' but these vermin also bring their rape culture along with them and actually perform that act at public swimming pools PLUS they bring a plethora of exotic diseases which have necessitated the hospitalization of people who were in contact with those human rats in a swimming pool. That according to an article which circulated on Facebook recently. Here are some other headlines: 'Germany's Migrant Rape Crisis Spirals out of Control,' Locals Fled Pool After Migrants Masturbated Into Jacuzzi,' and, 'Man who raped 10 year old boy at swimming pool in Austria gets away with it.'

Since the preceding headlines are becoming commonplace in Europe and with the Muslims who managed to get into Australia, we thought it might be a good idea to examine the 'refugee' issue and how it will affect Canada. To that end we looked up some information about Doctor Jane Philpott, the National Health Minister and what she has said about the issue in question. First off, let's meet Jane. She is a Liberal through and through. A do gooder who spent some years in Niger working with the retarded Negroes there, since they are incapable of helping themselves and good hearted Jane went there to help stem the AIDS epidemic amongst a people who think that by killing a baby, or perhaps eating it, or doing some other weird primitive hocus pocus stuff will prevent disease; maybe crucify a cat or something. We have but a glimmer of what goes on there in that Dark Continent. Mister Kurtz, in Heart of Darkness, by Joseph Conrad had an idea. 'The Horror. The Horror...'

Anyway, here are some quotes from Jane regarding her department's response to the 'crisis,' cough, cough: "It will always be in the forefront of our response to this, [concern for the health issues affecting the invading vermin/er, cough, 'refugees.' -Ed], but it will also not affect our ongoing compassion and our sense that we as a country need to respond to a humanitarian crisis." Of course we know exactly what Hegel espoused about dialectics.

"Many, many people have been working in the background over a long period of time to address how this can be done effectively."

The first sanctioned invasion of sub Saharan human rats numbered 25,000! All of them coming from countries where there is very little if any documentation. Think of it. In Somalia, the average Negro fires neurons at a 60% rate compared to the average White NORAMian, who scores around 98%, now that the overall North American IQ ratios are lowering because of the influx of *üntermenschen* subtracting from the score which was once set at 100. What makes the Health Minister think that diseases the invaders are carrying are documented or even screenable? How do you screen 25,000 creatures fast tracked by a jewish run government hell bent on destroying the White Race? And, does Jane think, just because those things come to Canada they will be suddenly civilized and not jack off in a

public swimming pool or rape a boy in a shower stall and give the kid a good dose of something terrible, such as a life threatening disease such as, AIDS?

Not all politicians are on side of this attempt by the Liberal government under the jewboy, Justin Trudeau, the likely offspring of Fidel Castro and Margaret Spencer/Trudeau; who openly confessed in an interview on CBC after her return from Cuba, 'that he, (Fidel) is *quite* a man.' The way she said it made what happened in Cuba pretty obvious to this writer when he heard it. Anyway, we digressed, as we are wont to do from time to time as we learn more and more about this topsy turvy justified world we live in. Anyway, to continue. Brad Wall, the Premier of Saskatchewan does not want migrants in his province, and neither does Quebec City Mayor, Régis Labeaume want them in his city or province. Those are wise men. They know what those sub Saharan chimp hybrids bring with them. Their retarded violent behaviour does not change just because they come to Canada and are fast tracked for citizenship.

Our EDE, who has lived in Canada for 55 years, and was born oversees, and who has a Canadian passport from 1972, which is proof that he is a citizen, can not use that passport to renew it and has to jump through a number of hoops and pay a lot of money to try and prove he is a citizen. He sent a letter to the minister in charge and has not received a reply six months later and yet, creatures from the Dark Continent where indigenous people never even invented a plank, are crawling with weird diseases and exotic smells which make the nose crinkle, are given carte blanche, including a very generous food allowance which exceeds the monthly income of many Canadian seniors. And, still, when one speaks of this to average Canadians and mentions the 'refugees' and their penchant for rape, women will say, 'oh, that has nothing to do with refugees. Rape is up all over the place. It's not just them....' When one suggests they had better consider arming themselves, they look away when presented with a gleaming stainless steel tomahawk or an effective sharp knife. When one suggests the people of Canada should be carrying side arms, those very same sheepified Canadians just about faint in their chairs.

The Federal Minister of Defence for Canada relies on one, Prof. Wesley Wark, a 'national security expert,' who is obviously a moron which is abundantly clear from silly nonsense he has uttered: "the attacks on Paris are not a reason for the Canadian government to stop fast-tracking the resettlement of 25,000 refugees."

"I don't think there is any truth to the idea that the refugee and migrant stream contains secret ISIS supporters and jihadists who are using that flow to position themselves for attacks,"

"If you're planning an attack, particularly a major co-ordinated attack abroad, the last thing you're going to do is count on one of your attackers getting through the refugee and migrant streams. I don't think it's a major security risk."

Question: If you were presented with a jar full of jelly beans and are told that three are poisoned and will kill you instantly, would you take a jelly bean from the jar and eat it?

We at Down the Rabbit Hole are concerned that far too many people are deliberately ignorant and prefer to turn a blind eye to this incredibly dangerous invasion of hive minded, violent simpletons who are admonished to reproduce in great numbers by impregnating as many women as possible. We have already seen this manifested in RedDeer. One Muslim man pushing a baby carriage with a wee Muslim, two women in bed sheets all covered up, but, being 'Syrians' these women showed their faces, at least, and seven little Muslims, some of them in sheets, as well; so they are nearing reproduction age.....
